

**JACK**

World No.1

Shanghai stock  
listed

No skipping stitches computerized  
eyelet button holing sewing machine  
No skipping stitches when changing models and materials

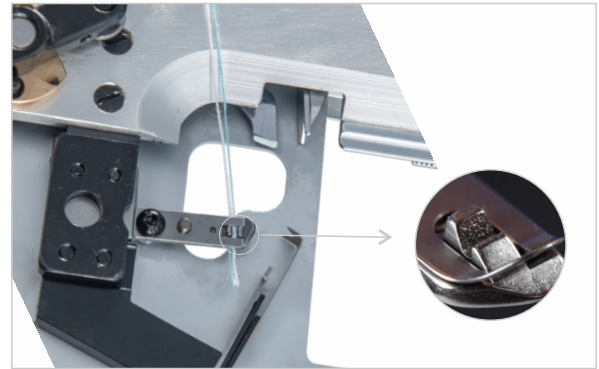

**JK-T9820G**

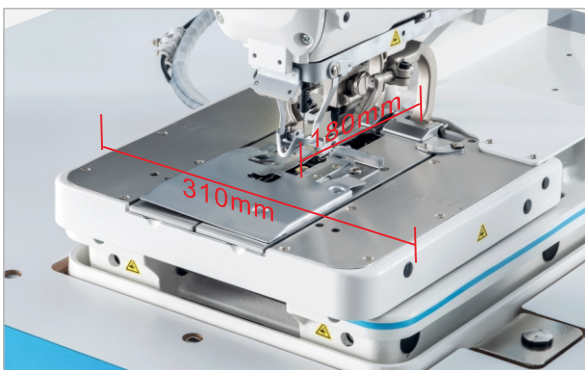

## Make an additional 380 buttonholes every day

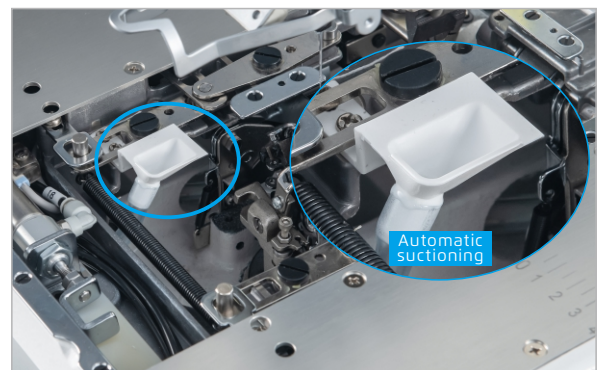

**O** second synchronization technology  
 PID control algorithm, 64 alignment calculations per stitch. Ensure that there is no skipping when sewing on various fabrics, the stitches are accurate and do not run out of position, realize no skipping when changing models or fabrics

**Double hook clamping technology**  
 99.99% success rate in thread clamping, ensure there is no skipping or taking off the thread

**Large space is easy to operate**  
 The 180mm long depth and 310mm wide feeding table provide a large space for easy operation, and can flexibly respond to a variety of sewing conditions

**Automatic suctioning of cloth shavings**  
 Automatic sucking up of the thread, no need for manual cleaning

### Specification

Button Hole Length	5-42mm
Parallel Interspace	0.5-2.0mm
Stitch width	1.5-5.0mm
Tapered reinforcement length	0-20mm
Pressure foot height	Factory(Default)12mm, Highest(maximum)16mm
S.p.m	2500rpm
Motor rated power	750w
Volume of air used/min	43.5L
NW/GW/kg	210/255
Wooden Package/Covered Area	1220x940x1430/1200x780mm

Stitch shape			
No reinforcement seams	tapered reinforcement seams	straight reinforcement seams	circular reinforcement seams
cap hole
